

Roofing in Moorpark

Re-roofing in Moorpark requires a permit from Building and Safety and involves two inspections. The first is a roof nailing inspection, where an inspector will inspect the nailing pattern of the roof deck and a final inspection, to ensure the job was completed. The City has no minimum requirements on the type of product to be installed and follows California's 2007 Uniform Building Code. However, if you are part of a Homeowners Association there may be restrictions on the particular roofing product or color you install. For additional information you may contact Building & Safety at 805-517-6270 or online at <http://www.ci.moorpark.ca.us/bldgsafety/bldgsafety.htm>.

Moorpark Roofing/Repair Requirements
